ADDRESS ALL COMMUNICATIONS TO THE SECRETARY

VIENNA, AUSTRIA Sept. 15 1928

My dear Dr. Brougher:

A review of your work on Parathyroid Tetany in the A. M. A. has prompted me to do what I should have done for months. I never forget my good intentions - I am simply lazy to correspond. -

It will interest you to know that the Vienna Society of Internists was quite interested in our mutual work on PTH secretion and sent me an invitation to give a talk at one of their regular meetings - I have had the occasion to discuss this problem with Prof. Schur

- the proponent of the autrum theory
and so far hasn't had the necessity
to blush for our point of view.

At the beginning I have spent my
time in theoretical work, but lately I
have been doing nothing but clinical
surgery; anatomy, diagnosis and
actual clinical work - after all these
months I am only now beginning to
see some progress and therefore getting
more enthusiastic. Will remain in Vienna
about three months longer and then
I intend to spend some time in the
surgical clinics of Western Europe.
