Re: Mrs. Henry Oswin

Dear John:

I had received the x-rays on the above patient when she reported to my office for examination.

On checking her over I find that she does have very poor posture with sway back and a painful coccyx, the coccyx being sharply anteverted. As your x-rays showed, she has a horizontal sacrum and an ununited 1st sacral lamina.

I started her on a routine of postural exercises and massage, devoting a little attention to her general condition. I hope that as time goes on she will feel more comfortable.

I am instituting conservative treatment, namely hot sitz baths, for the coccyx.

Thank you very much for referring this patient to me. I hope to see you before too long.

Sincerely yours,

HARRY L. LEAVITT, M. D.
