Rosamund Bourke is a Research Associate of the Welsh National Centre for Religious Education, University of Wales, Bangor. Her earlier research centred on musical ability and led to the publication of the books *The Psychology of Music and Psychology musikalischen Verhaltens* and other articles in that area under the name of Rosamund Shuter-Dyson. For several years she was editor of *Psychology of Music*. Her present research includes the personality characteristics of religious persons, Quakerism and the attitude to religion of church musicians.

BOOK REVIEWS

American Quakers who gained national or international prominence usually did so as a result of their work in reform or international peace. Clarence Pickett, Rufus Jones and Henry Cadbury fall into this category. So does John Woolman, who is perhaps the best-known American Friend. But close behind Woolman is Levi Coffin, the Indiana anti-slavery reformer who merged his energy for religion with his concern for social justice to help bring down the empire of slave holders in the American South. Mary Ann Yannessa’s study joins nearly a dozen books of historical fiction and non-fiction that have been written about Coffin since his death in 1877. Coffin’s own Reminiscences were published in 1898, and since then, authors of children’s books, professional and amateur historians, black pride advocates, and inspirational writers have found Coffin to be good grist for their mills. Yannessa’s work falls into the last category. She begins by noting Coffin’s commitment to ‘the faith of his ancestors’ which, she tells us ‘emboldened’ him. And she closes her little volume by comparing Coffin’s vision to that of Martin Luther King, the modern social justice reformer. In between she introduces us to aspects of the life of this remarkable nineteenth-century American reformer.

Yannessa clearly likes Coffin, and wants her readers to like him too. She gives us insight into his family beginnings in North Carolina, his efforts at establishing an African-American school there, and then his marriage and his removal to Ohio and Indiana, where other reform-minded Friends were also trying to help freed slaves establish communities, safety and educational opportunities. Coffin’s struggles to keep his faith and his vision alive in the face of individual hostilities, and eventually, in the face of civil war, and then what she terms his ‘final call’ as he worked to build British and American support for freed people after the Civil War—all of this Yanessa chronicles in readable, accessible language. And always she keeps her eye—and ours—on Coffin’s religious faith as the empowering force in his work.

Yannessa’s essay is, in many ways, a short sermon. She recounts aspects of Coffin’s life and then asks the rhetorical question, ‘Does America yet understand?’ And it is understanding this aspect of Yanessa’s writing that we get an answer to the question, ‘Why do we need yet another biography of Coffin?’ In fact, though much has been written about him—and the best account to date of him and his context is in Thomas Hammer’s God’s Government Begins (Bloomington: Indiana University Press, 1995)—we still do not have a modern, full-length, authoritative and scholarly study of this fascinating man. But that is not...
what Yanessa is about. Instead, this volume is about bringing Coffin alive again for a new generation. If Yanessa, who is a speaker for the new Underground Railroad Freedom Center in Cincinnati, Ohio, seeks to educate the Center’s diverse and visitors, we as to increase their understanding of the intricacies of Underground Railroad, this easily readable little volume will serve that function well.

The strength of Yanessa’s work is that it portrays Coffin not as a giant, not as larger than life, but rather as an ordinary man, drawn by his conscience to grow into the work to which God calls him. Readers who remember that the nineteenth-century American West was a Mecca for various Americans and Europeans seeking utopian social perfection will see him in context, and ask themselves if they believe they might envision and work for a better world. In short, Yanessa’s readers will be inspired to meet this man who helped shape a time and a movement.

Though this is not designed to be a scholarly study, Yanessa raises some insightful issues that should interest scholars. She mentions, for example, that while abolitionism has become inextricably linked to our historical memory of early Friends, abolitionism is neither an obvious, nor an inevitable result of Quaker faith. She reminds us that many Friends held slaves, were loathe to relinquish this privilege, and it required some well-focused theological maneuvering to create anti-slavery rhetoric within Quaker thought. Only with careful research did nineteenth- and twentieth-century scholars find evidence in the thought of Penn and Fox that supports an anti-slavery posture. Yanessa also invites us to explore further the kinds of questions raised by Jean Soderlund in Quakers and Slavery: A Divided Spirit (Princeton, N.J.: Princeton University Press, 1985). Soderlund chronicles the difficulty Delaware Valley meetings had with rethinking the meetings of the blight of slave-holding, but we need fuller exploration of the community life in North Carolina that resulted in subsets of meetings removing themselves to the western frontier. In her discussion of the divisions within Quaker abolitionist communities about means and ends—schemes to colonize freed people in Africa or the American West, Free Produce strategies, and the risks or values in flouting the laws—Yanessa invites future researchers to investigate the divisions and shifting loyalties that abolitionism and the Underground Railroad engendered within and among meetings and families. And in her gentle reminder that the black recipients of Coffin’s largesse were not helpless but were themselves creative and savvy strategists, she affirms our understanding of meetings removing themselves to the western frontier. These cases were chosen, however, according to a particular set of criteria not linked specifically to their religious orientation: a public identity as an ‘activist’ or ‘speaker’ or a public role in the movement. The opposition they encountered in so doing rapidly led them also to explore the subject of the other’s sex. Much has been written on this subject, but there is little that has focused on the religious motivation of such women activists.

Anna Speicher asks, ‘What forces sustained women who embarked upon what was certainly an unconventional, and sometimes an unpopular, even dangerous course of action?’ Her working hypothesis in beginning her study was that their religious beliefs and values provided them with a keen sense of social justice, and strengthened the will that was needed to embark on and sustain such activities. Anna Speicher explores this argument through five case studies: the sisters, Angelina and Sarah Grimke, Lucretia Mott, Abby Kelley Foster and Sallie Holley. All except Sallie Holley were members of, or had at some time a connection with, the Society of Friends. These cases were chosen, however, according to a particular set of criteria not linked specifically to their religious orientation: a public identity as an abolitionist, a willingness to travel in the cause and speak on it to mixed public meetings; the legacy of a significant body of primary source material, especially in the form of personal letters and journals. As Anna Speicher acknowledges, these criteria together serve to exclude any consideration of some notable African-American women abolitionist speakers. Her discussion moves between biographical and analytical chapters, making this an accessible and readable introduction to debates around the study of the abolition movement.

The findings made by Anna Speicher require her to amend her original hypothesis, however, so that she argues that religion was not simply a sustaining resource for these five women, but ‘the fundamental organising principle of their entire lives’ (p. 2). She disputes, therefore, a common argument with regard to such reformers, that reform became their religion. Rather, she suggests, that their religious world view was the prompt to their...
